We are sure each and every one of you has enjoyed the beautiful Rainbows in the summer months — the exquisite coloring so vivid, the picture remained for days. This is the impression you will receive when looking at a bed of bloom supplied by these mixed varieties of Tulips. An unusual range of color in reds, yellows, purples, pinks, white, etc. Our customers have been so delighted with this assortment, we have decided not to offer any other variety of Mayflowering tulips in Darwins, Cottage, Rembrandts, etc. We are listing the early RED EMPEROR only, in named varieties. This is a real money-saving value in high quality bulbs. These are not the usual so-called "Bargain Bulblets." Each bulb measures about 4 inches around — the size of a 50c piece. SATISFACTION GUARANTEED. We cannot stress too strongly that you order early, for the supply is limited.

# TREE PEONIES

**"The KING of FLOWERS"**

**USUALLY \$10.00 to \$15.00 EACH and SCARCE AT ANY PRICE."  
WHILE THEY LAST! EACH \$3.75, 2 for \$6.95, POSTPAID.**

TREE PEONIES are a low, many branched shrub, growing 3 to 4 feet high, bearing giant size flowers in many shades of red, pink, purple, white and bi-color. They have been grown in China for a thousand years, first in the gardens of the Ming Emperors, where they gained the name "THE IMPERIAL FLOWER OF CHINA." The Chinese also call them "THE KING OF FLOWERS" because of their rare beauty and king-size blossoms. The flowers often measure 10 to 12 inches across, and have the texture of fine crepe silk. They are fragrant. They are hardy-long-lived-disease resistant. Grow well in any climate. Have been known to withstand 40 degrees below zero temperature. Need very little care. The sparkle and beauty of TREE PEONIES in full bloom are beyond description, and are even more spectacular and beautiful than the finest hybrid Rhododendron.

Colors offered: Red, Pink, Purple and White. Please give us, first, second and third choice in colors.

# HARDY JAPANESE YEW

**Most Luxuriant Evergreens Grown!**

★ **Extremely Hardy.**

★ **Easy to Grow.**

★ **Do Well in Shade.**

★ **Landscape Favorites.**

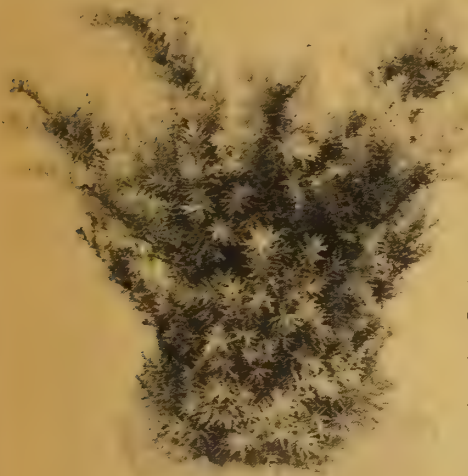

Without a doubt, the Yews are among the finest and most luxuriant Evergreens grown. They are extremely hardy, easy to grow, do well in shade, and are especially fine in landscaping the new type home being built today. All varieties offered below have the same type needle, which is a rich deep green in color, with waxy appearance. Will withstand complete shade, and can be sheared any shape or size.

**CAPITATA (Upright) YEW.** The normal habit of this type of Yew is a pyramidal form, broad at the base and tapering to the top of the tree. This variety has but one leader, whereas the Hicksi has four or five. Same waxen green needles as all the Yews, which color it retains throughout the year. Hardy. At maturity, attains height of 10-12 ft. Price: 12-15 inch Transplants, \$3.25 each; 2 for \$6.25.

**INTERMEDIA YEW.** Grows similar to the Hicksi, but is shorter and broader. Ideal for hedges or any use requiring trees of dwarf habit, such as under window planting, etc. Price: 15-18 inch Transplants, \$2.95 each; 2 for \$5.50; 4 for \$10.00.

**HICKSI (Upright) YEW.** Same foliage characteristics of all the Yews. Grows in columnar, erect form. Excellent for corners and entrance planting. Foliage will be extremely dense and compact from ground up by shearing tree lightly as it grows. This columnar form with branches ascending almost vertically, generally grows very many stems. Its normal growth is narrow because of its branching habit, but by trimming when small, it can be grown into extremely narrow form. This tree seems to be very resistant to extremes of heat and drought. Price: 15-18 inch Transplants, \$2.95 each; 2 for \$5.50; 4 for \$10.00.

**SPREADING (Cuspidata) YEW.** Spreading type. Numerous red berries in Fall. May be sheared for low hedge; ideal for under windows. Size and shape of tree can easily be controlled by pruning; pruning several times during growing season will produce a compact tree. Price: 15-18 inch Transplants, \$3.25 each; 2 for \$6.25; 4 for \$12.00.

## Robinson

### 30 Berries Will Fill a Quart

Still one of the best medium to late — 10 days to 2 weeks later than Premier. The largest berry we have ever seen — 30 berries will fill a quart. Berries are extremely large, and honey-sweet. Color is decidedly a cardinal-red. Berries have a firm, tough skin, making it an excellent shipper to distant markets. An excellent plant maker on most any kind of soil. Premier and Robinson, still the two leading varieties, will give you berries over the entire season.

PRICE: 25 for \$1.75; 50 for \$2.75; 100 for \$4.45; 250 for \$8.75; 500 for \$12.95; 1,000 for \$18.95.

## EARLIDAWN

This variety originated as a seedling from the cross of Midland x Tennessee Shipper. The earliest of all to ripen — about 5 days before Blakemore. A nearly FROST-PROOF variety — its flower stems are short and the flowers are well covered by leaves to protect them from frost.

Berries are average large in size; are fairly uniform in shape; the color is a strong vivid red, a little deeper than Blakemore, and glossy. Berries have a tough skin-firmer than Sparkle. Flavor is tart and good. Excellent for freezing.

Plants are vigorous, very productive; make an excellent fruiting row. As Earlidawn has already produced 25% of its crop by the time Blakemore starts ripening, it will command highest market prices. EARLY RIPENING plus HEAVY PRODUCTION means EARLIER and LARGER PROFITS for the grower.

PRICE: 25 for \$1.95; 50 for \$3.25; 100 for \$5.50; 250 for \$9.75; 500 for \$17.50.

## New SURECROP

Developed by U.S.D.A. and Md. Agriculture Experimental station. It ripens midseason with Fairland. Is a vigorous plant with many runners. Produces an abundance of fruit over a long period of time. Berries average large in size throughout picking season, are light bright red color that becomes a rich red but does not turn dark. They are firm with a tough, glossy skin, flavor is tart and good. Excellent for freezing. It is most useful to grow in red-stele, infested soils; because of resistance to more than one race of red-stele. In our opinion it is one of the best all around Strawberry introductions. PRICE: 25 for \$2.00; 50 for \$3.50; 100 for \$4.95; 250 for \$9.50; 500 for \$14.00; 1,000 for \$22.50.

## A Word About ACKERMAN'S QUALITY GUARANTEED PLANTS

Many claim to be the largest growers of plants, many claim to grow the best plants. We have made tests with strawberry plants received from some that make extravagant claims, and we say this in all truthfulness, we have never received or tested any better plants than those we send our customers. Our plants are all grown on fumigated land, have been twice inspected by authorized State Inspectors, and have been certified to be apparently free from all disease. We guarantee the plants we grow and sell to be as large and as good quality as you get anywhere (no matter what you pay), and to reach you in good growing condition.

**POCAHONTAS.** A new introduction of the U.S.D.A. (Midseason). A large, deep vivid red berry, which we know will be as popular with the commercial grower and home gardener as its Namesake was with Capt. John Smith! Berries are of good color, very firm, highly flavored — excellent for freezing. A leader due to its strong plants and productiveness. We know you will be proud of the results you receive. Price: 25 for \$1.85; 50 for \$3.00; 100 for \$4.65; 250 for \$9.25; 500 for \$13.50; 1,000 for \$19.95.

**DIXIELAND.** A new introduction of the N. Car. Agricultural Experiment Sta. Ripens early — about the same time as Blakemore. Berries are very uniform in shape and color; sweet flavor. Rapidly replacing Blakemore in eastern and northern states because of greater vigor and larger berries. Exceptional for freezing. Vigorous growing plants. Price: 25 for \$1.85; 50 for \$3.00; 100 for \$4.65; 250 for \$9.25; 500 for \$13.50; 1,000 for \$19.95.

**EMPIRE.** Introduced by the N. Y. Experiment Station. Berries average larger and of better quality than Premier; are pointed, very glossy light red. Excellent for freezer and market due to its firmness, color and flavor. Very attractive. Ripens 4 to 5 days after Premier. Plants are sturdy, heavy yielding, and produce many runners. Stands dry weather as well as the best. Price: 25 for \$1.85; 50 for \$3.00; 100 for \$4.65; 250 for \$9.25; 500 for \$13.50; 1,000 for \$19.95.

Is Red Stele resistant. Midseason ripening. Price: 25 for \$1.85; 50 for \$3.00; 100 for \$4.65; 250 for \$9.25; 500 for \$13.50; 1,000 for \$19.95.

# PEACHES

**There's A Difference. Northern Grown. Buds Especially Selected from Heavy Bearing Trees; Insures a Bumper Crop. Absolutely true-to-name, vigorous, well-grown, perfectly healthy, with well-ripened wood and splendid roots. Guaranteed to reach you in good growing condition.**

**ELBERTA.** Standard market peach of the entire country. Very large; yellow with red blush; flesh is yellow, tender, and juicy; very highly flavored. Rank vigorous grower. Ripens middle of Sept. Freestone and self-fertile.

**AMBER GEM.** This grand variety is a semi-cling; shaped like an Elberta and ripens same time. Beautiful yellow flesh with deep red blush; delicious honey-sweet flavor. Will hang on the tree for 10 days to 2 weeks after it ripens. One of the largest peaches grown. Used extensively by all canning factories. Hardy and very productive.

**FAIRHAVEN.** Hardy, Early Ripening, Heavy Producing Wonder Peach. At least half of the fruits of Golden Jubilee will have been picked when Fairhaven begins. Fruit is medium-large, nearly round, bright golden in color, with a bright red cheek. Skin smooth and tough. It resists browning. Freestone when fully ripe.

**HALE-HAVEN.** A cross between South Haven and J. H. Hale. Freestone. Strong grower, very hardy, heavy bearer; excellent flavor. Ripens 15 days earlier than Elberta. An excellent yellow freestone.

**Two new Peaches, which we introduced for the first time in 1958. They were originated at the Michigan Agricultural Experiment Station. Namely, the New RICHHAVEN and SUNHAVEN.**

**New RICHHAVEN.** Richhaven ripens with Halehaven, about 14 days before Elberta, but because of its bright color, it might be picked 2 to 3 days before Halehaven. Fruits are larger than Halehaven, nearly round, and uniform in size and shape. The ground color is bright golden, overlaid with a large, bright red blush on the area exposed to the sun, with stripes of red and gold on the opposite side. Fuzz is so short and soft as to be nearly unnoticeable. Flesh is clear yellow with moderate amount of red near pit. Medium in texture and resistant to browning. Freestone. Excellent for commercial canning. Unusual thick, tough skin adds to handling and shipping ability of fruit. Trees are large, vigorous and productive. Exceptionally hardy.

**New SUNHAVEN.** Very Early! 40 DAYS AHEAD OF ELBERTA. The success of the Redhaven variety resulted in many requests for a variety of this type maturing earlier. Sunhaven is being introduced to meet this need. It ripens very early, 10 days before Redhaven and 40 days earlier than Elberta. Fruit is medium-large in size, nearly round, and uniform in shape. Skin color is much like Redhaven, largely bright red with enough bright golden color for pretty contrast. Short, soft fuzz, almost unnoticeable. Fruits keep and handle unusually well for such an early maturing variety. Flesh is clear yellow, fine-texture, firm, of good flavor and very resistant to browning. Sunhaven is a freestone when fully ripe. Its early ripening assures you of BIG PROFITS for your fruit.

**RED GOLD GIANT.** The Improved Hale! Truly the Giant of the peach family — many peaches weighing 1 pound each. A bud sport of the common Hale, but is larger and bears heavier — often one half bushel the second year. Freestone. Almost fuzzless. Fruit is round; skin is golden yellow, heavily blushed with red; flesh is yellow, firm, solid and delicious.

**RED HAVEN.** An excellent early maturing peach. RIPENS 30 DAYS EARLIER THAN ELBERTA. Yellow freestone, almost completely covered with a brilliant red color; sweet in flavor. Firm flesh and tough skin. Heavy producer.

**PERFECT HALE.** A Profit Producer. This variety will produce full crops of beautiful large peaches, entirely free from all so-called "buttons" so prevalent in J. H. Hale, for it is self-fertile. Season little later than Elberta. Fruit very large; flesh yellow, with deep carmine blush. Very hardy freestone. Splendid market variety.
